

IBM Bob AI Modernization Advisor

AI-driven assessment & migration planning for App Connect Enterprise → Cloud Pak for Integration

Today's Reality

- Limited visibility into integration assets and dependencies
- Weeks of manual assessment before modernization can begin
- High uncertainty around migration effort, cost, and business risk

With IBM Bob

- Discover your integration landscape
- Generate an AI modernization roadmap
- Recommend migration priorities and quick wins

Migration Roadmap
Effort, quick wins & sequencing

Cloud Pak for Integration
Target Platform

- Containerized runtimes
- Elastic scaling
- Unified governance & GitOps

Data Source

ACE integration server (message flow , BAR files, flow XML, policies)

7 AI-Powered Capabilities

Analyze Integration Server

Scans flows, ESQL, adapters & configurations automatically.

Estimate Migration Effort

Projects effort to move workloads to Cloud Pak for Integration.

Recommend Quick Wins

Surfaces low-risk, high-value modernization opportunities first.

Generate Modernization Roadmap

Sequences a phased migration plan by priority and risk.

Estimate Person-Days

Converts effort into staffing and timeline projections.

Identify Reusable Assets

Flags flows and components portable to the target platform.

Generate Executive Summary

Produces a business-ready summary for stakeholders.

Business Outcomes

Reduction in assessment effort

Faster modernization planning

AI-generated assessment report

Consistent, AI-generated recommendations for every integration server assessed.
