

IBM JSphere Suite for Java & IBM Bob Java Premium Package

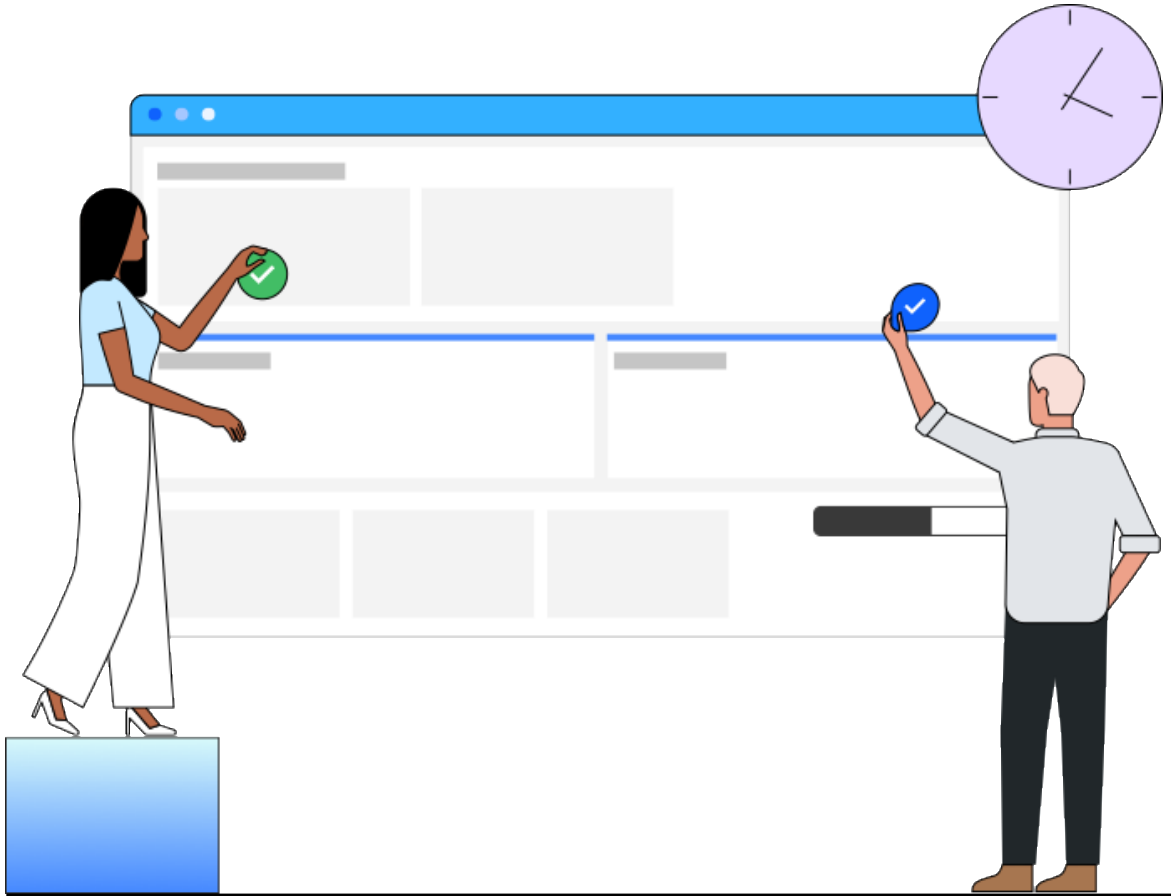

Fast-track your path to modern Java for future-ready, compliant applications

WW Service Engineering Lab

Java: Enterprise-ready by design

Over 90% of Fortune 500 companies use Java for enterprise software.

Mission-critical scalability

Powers high-traffic systems with proven reliability

Massive Talent Pool

Top 3 language with millions of developers worldwide

#1 for enterprise apps according to leading analyst

Hybrid Computing Pioneer

"Write Once, Run Anywhere" - containers to edge computing

Rich Ecosystem

Best-in-class tooling with Jakarta EE, MicroProfile, Quarkus, Spring, and enterprise management tools.

Critical IT challenges driving modernization

Innovation pressure

Need to accelerate feature delivery while managing legacy systems

Technical debt

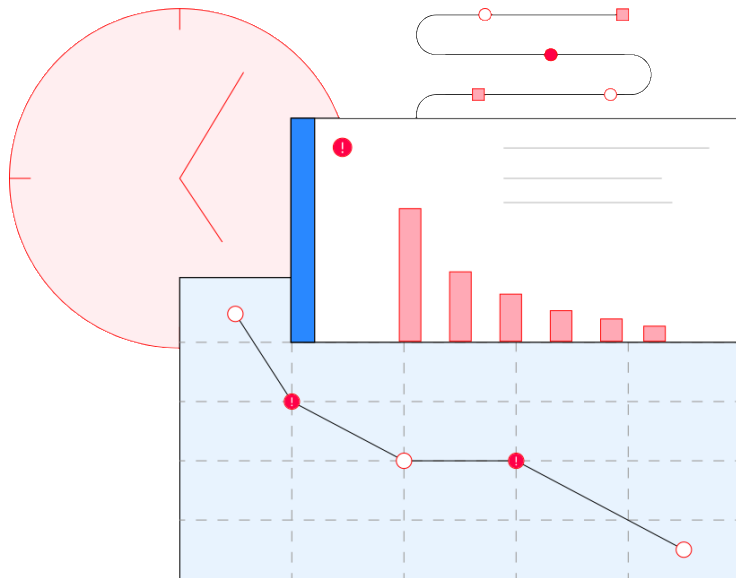

\$2.4T+ yearly losses from security failures and technical debt

Licensing costs

Unpredictable expenses as 66% of app spending shifts to cloud by 2025

Security risks

Need to accelerate feature delivery while managing

46%

increased spending on modernization

66%

of spending on applications will be on Cloud by 2025²

\$2.4 T+

per year in security, operational, and project failures due to technical debt³

84%

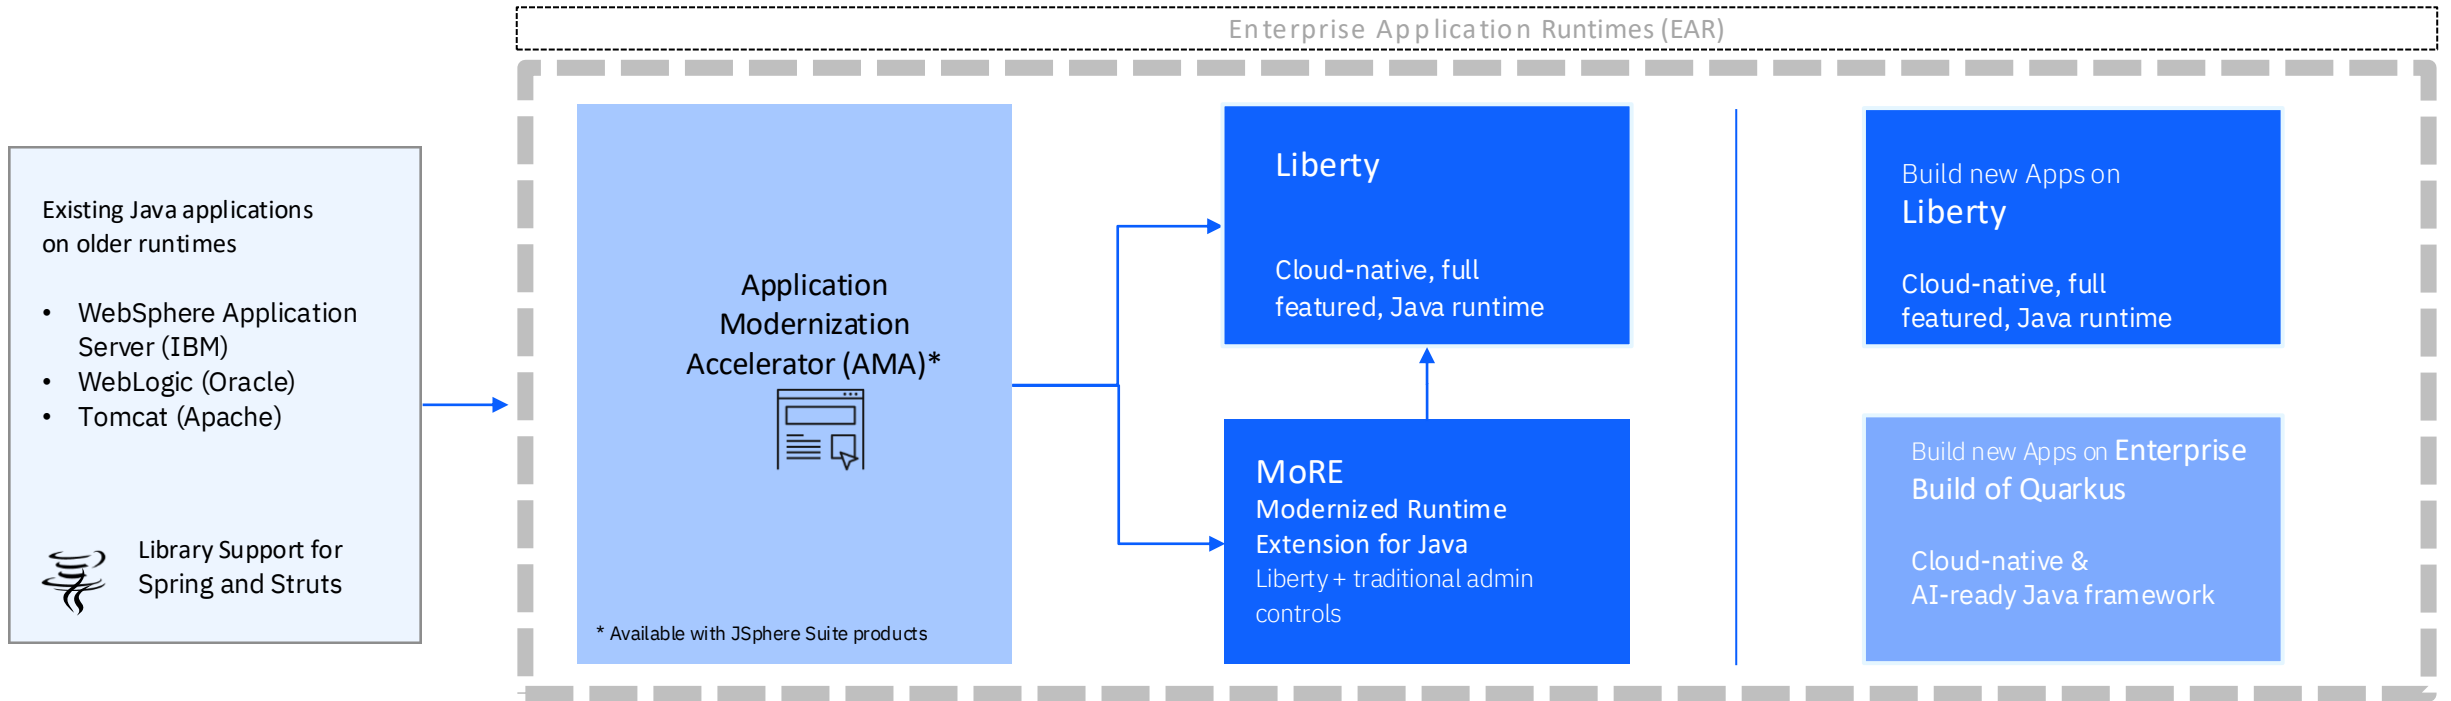

rate application modernization as top or high priority in next two-three years⁴

Modernize and build new with ease

Maintain

Modernize & migrate

Innovate

IBM Bob

Bottom line: IBM has simplified application modernization and dramatically reduced the associated cost and time
