

Fast track API development with IBM Bob and API Connect MCP server

Current Challenge

- Manual API specification and backend development
- Inconsistent OWASP security compliance checks
- Slow API deployment and testing cycles
- Complex API governance and project management
- Lack of automation across API lifecycle

Future Experience

- AI-generated enterprise-grade OpenAPI specifications
- Automated OWASP security validation
- Backend generation from API specifications
- Deployment to IBM Cloud Code Engine
- API Connect MCP integration with Bob for API management and testing

Team

- CE ECO Leader:
Vijay Bhaskar Reddy
- CE Architect:
Jyoti Rani

Data Source :

- None

Business Outcomes

- ✓ Faster API delivery and deployment
- ✓ Improved security and governance
- ✓ Reduced manual effort and errors
- ✓ Accelerated developer productivity
- ✓ Consistent enterprise API standards
- ✓ Streamlined testing and operations
