

Similisense AI – Homeopathy AI Assistant

Business Challenges

- ❖ Expert-dependent decision-making limits scalability
- ❖ Time-intensive consultations reduce patient throughput
- ❖ Inconsistent prescriptions across practitioners
- ❖ Limited digitization and structured symptom data
- ❖ Lack of intelligent decision-support tools

Value Proposition

- ❖ Scales expert-level decision-making across practitioners
- ❖ Reduces consultation time and increases patient throughput
- ❖ Improves consistency and accuracy of remedy selection
- ❖ Enables junior practitioners with AI-assisted guidance
- ❖ Creates structured, digital, and reusable clinical knowledge

Asset Highlights

- ❖ AI-assisted Homeopathy Agent improves speed, accuracy, consistency, and scalability of consultations with measurable productivity gains.

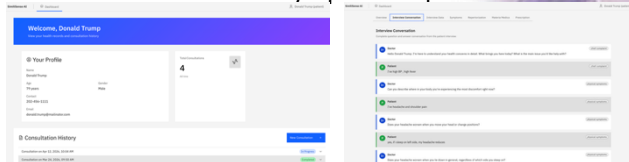

Benefits

- ❖ Reduces consultation time (~50–80%) and improves productivity
- ❖ Improves consistency and accuracy of remedy selection
- ❖ Enables junior practitioners with AI-assisted guidance
- ❖ **Allows patients to access homeopathy consultation from home**
- ❖ Creates structured, digital, reusable clinical knowledge

How it works?

Patient's Dashboard and Symptoms capture

Symptoms Analysis and prescription generation

Detailed report and approval

Target Client Audience

- ❖ Homeopathy clinic chains
- ❖ Telemedicine & digital health platforms
- ❖ Integrative medicine hospitals
- ❖ Homeopathy training institutes
- ❖ Digital health startups

Owner

- ❖ **Madhuri Pednekar, Solution Architect**
- ❖ Madhuri.pendekar@in.ibm.com

Why IBM?

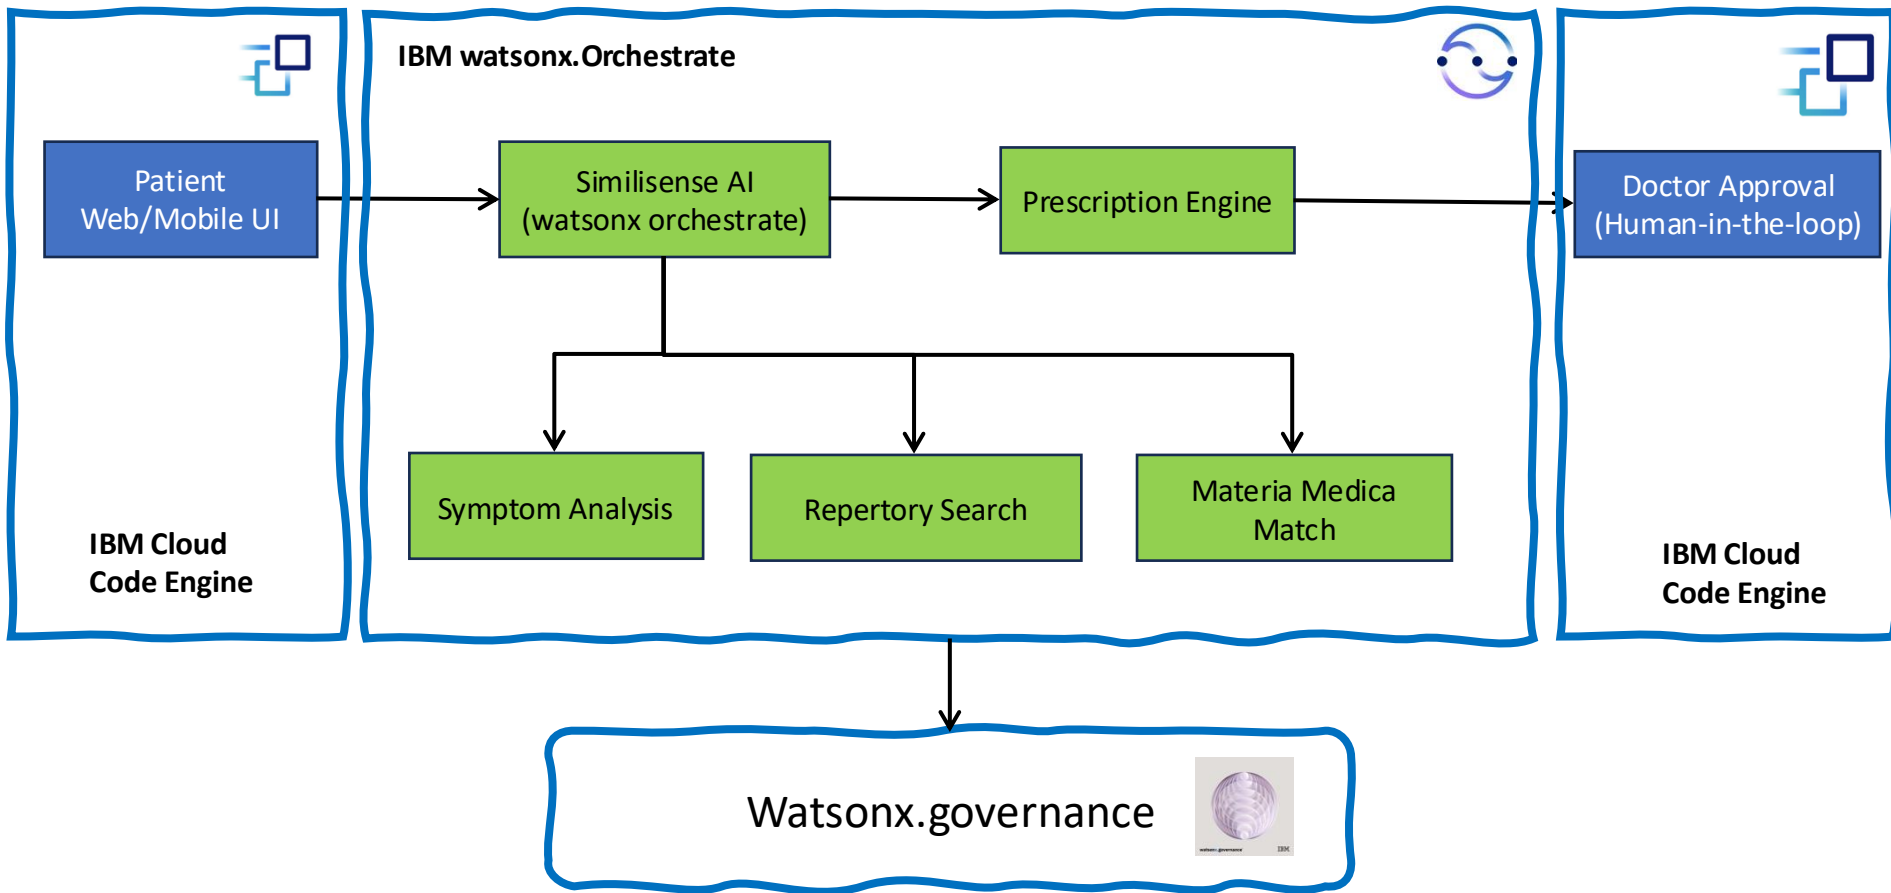

Enterprise-ready Homeopathy AI Agent built on IBM watsonx stack demonstrating **scalable, governed** clinical decision support.

Technology Stack

- ❖ IBM Bob
- ❖ IBM watsonx.orchestrate
- ❖ IBM watsonx.governance

Architecture

Similisense AI – Homeopathy AI Assistant

Scalable, governed AI-assisted clinical decision support

Market Opportunity

- ❖ \$15B+ global homeopathy market
- ❖ 200M+ users globally
- ❖ 250K+ practitioners in India

Strategic Alignment

- ❖ Showcases agentic AI capabilities
- ❖ Demonstrates AI governance
- ❖ Reusable healthcare accelerator
- ❖ Potential client-facing innovation asset

Technology Stack

- ❖ Bob
- ❖ watsonx.orchestrate
- ❖ AgentOps
- ❖ watsonx.governance

Key Challenges

- ❖ Expert-dependent consultations
- ❖ Long consultation cycles
- ❖ No AI-driven decision support

Business Value

- ❖ Faster consultations
- ❖ Remote consultation from home
- ❖ Scalable digital healthcare delivery

Target Clients

- ❖ Homeopathy clinic chains
- ❖ Telemedicine platforms
- ❖ Digital health startups
- ❖ AYUSH ecosystem
